嘎达山旅游开发项目

单位：万元人民币

序号	01				行业	文化旅游	
项目内容	综合开发嘎达山旅游景区。				建设地点	金川县	
					建设工期	5年	
					建设性质	新建	
项目单位现状	公司名称				法定代表人		
	设立时间		经济性质		职工人数		
	总资产		总负债		资产负债率		
市场分析 及 预测	随着人民收入的增加和生活水平的提高，国内旅游、入境旅游正在蓬勃发展，势头喜人；目前，旅游消费群体正在不断扩大，构成了一个庞大的旅游需求和消费市场，项目市场前景可观。						
建设条件	嘎达山景区幅员面积100平方公里，主要由嘎达山原始森林、东女国王城遗址、世界最高自生东巴石佛、琼布神山（大鹏山）、龙龟瀑布、悬空古庙、中国碉王、乾隆御碑、清四大皇庙-广法寺等景点组成，是古东女国王城所在地，也是苯波教东方大道场。景区内民风淳朴，至今仍保留着古东女国时期女权文化的遗风遗俗，是探秘、科考、度假旅游胜地。景区开发已完成可研，景区通讯、交通等基础设施配置齐备。						
总投资	56000		引进资金	56000			
			企业自筹				
经济效益							
前期工作	已初步选址和规划						
合作方式	独资、合资、合作

Development and Construction Project of Jiesi Glacier Scenic Spot

Unit: RMB 10,000

S/N	02				Industry	Cultural Tourism		
Project Contents	Develop glaciers and build biesiman folk culture in Xianghua village. Main contents include: new construction of roads, gallery roads, access control system, tourist service center, viewing deck, park, hotel and restaurant, self-driving camp, ecological toilet, etc. in the scenic spot.				Construction site	Jiesi Village, Xiaojin County		
					Construction period	Five years		
					Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment				Economic nature			Number of employees
	Total assets				Total liabilities			Asset-liability ratio
Market Analysis and Forecast	The project construction site has Tibetan village with a long history, Jiarong costume with unique features, old and doughty pyrrhic, "Situ" old Guozhuang, etc. which can make people feel various miracles of Jiarong Tibetan folk customs. The scenic spot is mainly to develop special tourisms (such as ice climbing and exploration) and simultaneously develop self-drive travel and country tour. In recent years, Xiaojin County' tourism industry has grown rapidly and tourist accommodation has grown stably. In 2013, it received the tourists of 650000 person-times, which can provide enough customer sources for project construction, and it has broad market prospects.							
Building Conditions	The project construction site has complete infrastructures such as water, electricity, road and communication; Xiaojin County' s tourism industry grows rapidly, which can provide adequate tourism market for project construction.							
Total Investment	50000		Introduction of capital		50000			
			Raised by the enterprise itself					
Economic Benefits	Monthly tourist reception capacity in peak tourist seasons (from May to October) is about 10000 person-times, monthly tourist reception capacity is up to 5000 person-times in tourist off-seasons (from November to April next year), it is predicted that annual income of RMB 54 million can be realized.							
Pre-phase Work	The project has been listed in Overall Tour Plan of Xiaojin County from 2014- to 2025, Tibetan projects, the 12th five-year plan project; preparation of project proposal has been completed.							
Ways of Cooperation	joint venture,sole proprietorship

莲宝叶则景区开发项目

单位：万元人民币

序号	03			行业	文化旅游		
项目内容	新建景区大门暨游人服务中心1处，休息亭5处，观景台1处，公路改造升级13.5公里，租马站2处，帐篷露营地1处，木质栈道1.2公里，生态停车场2处，太阳能供电工程1处，GSM电话网1处，景区导向标示系统，环保设施若干，湖泊湿地恢复1处，人文景观打造1处。			建设地点	阿坝县		
				建设工期	4年		
				建设性质	新建		
项目单位现状	公司名称				法定代表人		
	设立时间			经济性质	职工人数		
	总资产			总负债	资产负债率		
市场分析 及 预测	阿坝县莲宝叶则风景区独特的“石头城”景观，奇特的地质地貌和奇山秀水，为野外登山、探险、考察、滑雪、观光等生态旅游项目的开发提供了丰富的自然资源，项目的开发将对国际、国内游客产生极大的吸引力。						
建设条件	莲宝叶则风景区旅游资源风格独特、品位很高、可塑性强；地处川、甘、青三省结合部，紧靠“大九寨”旅游环线，具有明显区位优势、不可替代性和较高的开发价值；水、电、路等基础设施配置齐全。						
总投资	34000		引进资金	34000			
			企业自筹				
经济效益	项目建成后，预计可实现年利润5000万元。

Development Project of Lianbaoye Scenic Spot

Unit: RMB 10,000

S/N	03			Industry	Cultural Tourism		
Project Contents	Newly build one scenic spot gate and tourist service center, five half-way houses, one viewing deck, rebuild and update 13.5 km, newly construct two horse renting stations, one tent camp, 1.2 km wooden gallery road, two ecological parks, one solar power engineering, one GSM telephone network, guiding and signage system of scenic spot, several environmental protective facilities, restore one lake wetland and build one human landscape.			Construction site	Aba County		
				Construction period	Four years		
				Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative		
	Time of Establishment				Economic nature	Number of employees	
	Total assets				Total liabilities	Asset-liability ratio	
Market Analysis and Forecast	Aba Lianbaoye Scenic Spot has unique “Stone City” landscape, peculiar geological landform and rugged mountains and graceful water, which provide abundant natural resources for the development of the ecological tourist projects such as field climbing, exploration, investigation, skiing and sightseeing, and the project development will generate great attractions to international and domestic tourists.						
Building Conditions	Baolianyeze scenic spot has the tourist resources with special style, very high taste and strong plasticity; The project is locate at the junction of Sichuan, Gansu and Qinghai and adjoins “Dajiuzhai”, thus it has obvious regional advantages and it has irreplaceability and relative high construction and development value in Aba prefecture’s existing scenic spots.						
Total Investment	34000		Planned capital attraction	34000			
			Raised by the enterprise itself				
Economic Benefits	After the project is completed, it is predicted that annual profit of RMB 50 million and tax payment of more than RMB 1 million can be realized.						
Pre-phase Work	The preliminary planning of project has been basically completed.						
Ways of Cooperation	sole proprietorship, joint venture and cooperation

Construction Project of Wenchuan National Level Tourist Resort

Unit: RMB 10,000

S/N	07				Industry	Cultural Tourism			
Project Contents	It is planned to construct the supporting tourism infrastructures which can meet the tourists' leisure demands such as rest, recreation, sports, intelligence development and entertainment to form relative complete national level tourist resort.				Construction site	Wenchuan County			
					Construction period	Four years			
					Type of Construction	Newly Built			
Status Quo of Project Unit	Name of company				Legal representative				
	Time of Establishment				Economic nature			Number of employees	
	Total assets				Total liabilities			Asset-liability ratio	
Market Analysis and Forecast	According to the status quo of tourism resources and tourism facilities in Shuimo, Sanjiang and Xuankou, Wenchuan County, the tourists' leisure demands for rest, recreation, sports, intelligence development and entertainment will be met through construction of supporting tourism infrastructures. Every year the tourist amount to and from the Nine Loop Line is huge, and Wenchuan is the only way which must be passed; In 2013, our county has receipted the tourists of more than 6 million person-times. It has broad prospects and huge market potential relying on the huge leisure tourism markets in Chengdu and its surrounding big cities.								
Building Conditions	Southern ecological tourist resort has rich tourism resources, of which natural resources include three small categories, namely inland river (Shouxi River), mountain land and forest 3; human resources include four small categories, namely rural garden, traditional settlement (Shuimo Ancient Town and Village), theme sports (Sanjiang River Drifting, etc.) and human activities (Tibetan and Qiang folk customs and non-material heritage, etc.) . Vacation tourism resources have relatively high tourism carrying capacity and uniqueness, and in recent years, these vacation tourism resources have been reasonably developed and exploited and the construction of basic supporting facilities has been completed.								
Total Investment	50000		Planned capital attraction		50000				
			Raised by the enterprise itself						
Economic Benefits	Annual tourist reception capacity of Wenchuan County actually exceeds 6 million person-times. After the project is completed, it is predicted that it will realize annual income of RMB 40 million and annual profit of RMB 10 million if calculating according to annual tourist reception capacity of 2 million person-times and consumption per person of RMB 200.

汶川三江西河生态休闲观光旅游区建设项目

单位：万元人民币

序号	08				行业	文化旅游		
项目内容	景区内配套建设基础设施、游客接待中心等；包括开发度假山庄、漂流、骑马、射箭、登山、野营、观光娱乐等旅游项目。				建设地点	汶川县三江镇		
					建设工期	5年		
					建设性质	新建		
项目单位现状	公司名称				法定代表人			
	设立时间			经济性质			职工人数	
	总资产			总负债			资产负债率	
市场分析 及 预测	项目依托成都、重庆巨大的休闲旅游客源市场，三江景区适合开展休闲度假短程旅游，可开展攀登、漂流、骑马等活动项目。每年往返于九环线的游客量巨大，市场前景广阔。							
建设条件	西河生态休闲观光区位于三江生态旅游景区的西南片区、西河两侧，是一片尚待开发的区域。灾后重建后，三江镇至上坪的村道已修建水泥路面，公路长为9.8km，路面宽度4m。规划区水、电、通讯等基础设施齐备，可满足旅游开发需要。							
总投资	44000		引进资金		44000			
			企业自筹					
经济效益	项目建成后，按年均接待游客150万人次，人均消费200元计算，预计年收入可达30000万元，年利润约10000万元。

Ecological Leisure Sightseeing Tourist Area of Sanjiang Western River, Wenchuan County

Unit: RMB 10,000

S/N	08				Industry	Cultural Tourism		
Project Contents	Construction of supporting infrastructures and tourist reception center and so on in the scenic spot; including the tourism projects such as development of vacation mountain villa, drifting, horse riding, shoot, mountain climbing, camping and sightseeing and entertainment.				Construction site	Sanjiang Town, Wenchuan County		
					Construction period	Five Years		
					Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment				Economic nature			Number of employees
	Total assets				Total liabilities			Asset-liability ratio
Market Analysis and Forecast	The project is relying on Chengdu and Chongqing's huge leisure tourist source markets. The Sanjiang scenic spot is suitable for development of leisure vacation short distance travel, and can carry out the active events such as climbing, drifting and horse riding. Every year the tourist amount to and from the Nine Loop Line is huge, so the project has broad market prospects.							
Building Conditions	Western river ecological leisure sightseeing area is located at both sides of Western River in the southwestern regions of Sanjiang ecological tourism scenic spot, where is an area to be developed. After post-disaster reconstruction is completed, the village road from Sanjiang Town to Shangping has been built with concrete pavement, with a length of 9.8 km and a width of 4 m. In the planned area, infrastructures such as water, electricity and communication are complete, which can totally meet the tourism development needs. The project has obvious location advantages due to being adjacent to Chengdu and Dujiangyan.							
Total Investment	44000		Planned capital attraction		44000			
			Raised by the enterprise itself					
Economic Benefits	The project is completed, it is predicted that annual income of RMB 300 Million and annual profit of RMB 100 million will be realized through calculation according to annual tourist reception capacity of 1.5 million person-times and consumption per person of RMB 200.

米亚罗红叶风情和藏族文化体验区项目

单位：万元人民币

序号	09				行业	文化旅游		
项目内容	1、米亚罗和夹壁嘉绒藏族民俗风情、红叶风情体验区建设； 2、民居、碉楼维修保护及展示； 3、高原滑雪基地建设； 4、标识标牌建设等。				建设地点	理县		
					建设工期	4年		
					建设性质	新建		
项目单位现状	公司名称				法定代表人			
	设立时间		经济性质		职工人数			
	总资产		总负债		资产负债率			
市场分析 及 预测	米亚罗风景区是省级风景名胜，是全国面积最大的红叶风景区之一，也是嘉绒藏族的聚居地，该景区已具有一定的知名度；但由于景区缺乏文化依托，导致旅游出现季节性特征，难以留住客人，该项目的实施，将极大提高米亚罗景区的文化深度和接待能力，市场前景广阔。							
建设条件	米亚罗景区气候宜人，高原特征明显，具有丰富的嘉绒藏族文化底蕴；景区距中心大城市近，交通便捷；已有一定的知名度和美誉，有利于景区品牌打造和宣传。							
总投资	180000		引进资金	180000				
			企业自筹					
经济效益	预计投资回收期7-9年。							
前期工作	已完成旅游规划							
合作方式	独资、合资

"China Qiang City" Investment and Construction Project

Unit: RMB 10,000

S/N	09				Industry	Cultural Tourism				
Project Contents	1. Experience of Miyaluo and Jiabi Jiarong Tibetan folk custom and red leaf amorous feeling; 2. Maintenance, protection and display of folk house and watchtower; 3. Construction of plateau skiing base; 4. Construction of sign and mark.				Construction site	Li County				
					Construction period	Four Years				
					Type of Construction	Newly Built				
Status Quo of Project Unit	Name of company				Legal representative					
	Time of Establishment				Economic nature			Number of employees		
	Total assets				Total liabilities			Asset-liability ratio		
Market Analysis and Forecast	Miyaluo scenic spot is a provincial level scenic spot, one of China's largest red leaf scenic spots and also a settlement of Jiarong Tibetan people. At present, the scenic spot has a certain reputation; but the scenic spot is lack of cultural reliance, resulting in that tourism has seasonal characteristics and it is difficult to retain customers. With the implementation of the project, it will greatly improve cultural depth and reception capacity of Miyaluo scenic spot, and the market prospects are broad.									
Building Conditions	Miyaluo scenic spot has pleasant climate, obvious plateau characteristics, and rich Jiarong Tibetan cultural deposits. The scenic spot is close to central big city with convenient transportation; the scenic spot has owned a certain popularity and good reputation, which is more beneficial to its brand building and advertising.									
Total Investment	180000				Introduction of capital	180000				
					Raised by the enterprise itself					
Economic Benefits	It is predicted that the investment can be returned within 7-9 years.									
Pre-phase Work	The tourism planning has been completed.

西沟景区投资开发项目

单位：万元人民币

序号	10				行业	文化旅游	
项目内容	新建集住宿、餐饮、娱乐为一体的旅游度假村；新（改）建景区栈道、车道，徒步探险、野营基地、观光旅游项目等基础设施。				建设地点	松潘县施家堡乡	
					建设工期	3年	
					建设性质	新建	
项目单位现状	公司名称				法定代表人		
	设立时间			经济性质	职工人数		
	总资产			总负债	资产负债率		
市场分析 及 预测	西沟景区位于世界自然文化遗产黄龙景区和丹云霞景区之间，海拔1800米左右，景区内风光绚丽，景致独特，目前仍保持着原始的自然风貌，适合开发生态游、自驾游、户外露营游、徒步穿越游、科研考察游等，开发价值巨大。						
建设条件	景区尚未开发，保持着原始的自然风貌，可塑性强；紧邻黄龙、九寨沟风景区，游客众多，客源充足；水、电、路、通讯等基础设施配置完善，可满足项目建设需求。						
总投资	50000		引进资金	50000			
			企业自筹				
经济效益	项目建成后，预计可实现年利润5000万元。						
前期工作	项目前期规划正在实施

Investment and Development Project of Xigou Scenic Spot

Unit: RMB 10,000

S/N	10				Industry	Cultural Tourism		
Project Contents	Newly-built tourist resort integrated with accommodation, catering and entertainment; newly-built (rebuilt) infrastructures in the scenic spot such as gallery road, lane, hiking and exploration, camping base and sightseeing tour items .				Construction site	Jiabao Village, Songpan County		
					Construction period	Three years		
					Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment			Economic nature	Number of employees			
	Total assets			Total liabilities	Asset-liability ratio			
Market Analysis and Forecast	Xigou Scenic Spot is located between Yellow Dragon Scenic Spot and Danyunxia Scenic Spot, the World Cultural and Natural Heritages, about 1800 above sea level. The scenic spot has beautiful scenery and unique landscape, currently still remains original natural styles and features, suitable for developing ecological tourism, self-driving tour, outdoor camping tour, hiking tour, scientific research and investigation tours, etc. with great development value.							
Building Conditions	The scenic spot has not been developed yet, maintained original natural landscape and has strong plasticity; The scenic spot is adjacent to Yellow Dragon and Jiuzhaigou scenic spots with many tourists and adequate customer sources; The configuration of infrastructures such as water, electricity, road, communication is perfect, which can meet the demand of project construction.							
Total Investment	50000		Planned capital attraction	50000				
			Raised by the enterprise itself					
Economic Benefits	After the project is completed, it is predicated that annual profit of RMB 50 million can be realized.							
Pre-phase Work	The preliminary planning of project is in progress.							
Ways of Cooperation	Joint venture

神仙池风景区整体开发项目

单位：万元人民币

序号	11				行业	文化旅游	
项目内容	1、整体开发神仙池风景区，含新（改、扩）建旅游观光、藏羌文化体验、野外科考探险等项目基础设施。 2、新建高端会议度假酒店、高端养老休闲等配套服务设施。 3、新建连接九寨沟景区的交通隧道。				建设地点	九寨沟县大录乡	
					建设工期	5年	
					建设性质	新建	
项目单位现状	公司名称				法定代表人		
	设立时间		经济性质		职工人数		
	总资产		总负债		资产负债率		
市场分析 及 预测	神仙池风景区总面积约30万公顷，其景致兼具九寨风光之秀美和黄龙钙化彩池之奇，旅游开发品质极高。距九寨沟景区约40公里，与九寨天堂洲际大酒店仅一山之隔，与即将开工建设的中查沟国际会议度假区遥相呼应，是九寨沟景区周边唯一有待开发的处女地，是九寨沟县境内的稀缺资源。神仙池在历史上地处唐、蕃交界，周边生态环境极佳，拥有深厚的历史文化底蕴和保存完整的藏族苯教文化，区内适合建设高端休闲、娱乐、度假、避暑以及藏文化体验的旅游会所项目。						
建设条件	已累计投入资金2亿元，修建了道路、游客中心、观光栈道等基础设施，景区内全长45公里四级旅游公路；旅游市场成熟，2013年共接待海内外游客476万人次，可为项目建设提供充足的客源。						
总投资	500000		引进资金	500000			
			企业自筹				
经济效益	项目建成后，预计可实现年产值5亿元，年利润2.5亿元，投资回收期为10-20年。

Whole Development Project of Fairy Pool Scenic Spot

Unit: RMB 10,000

S/N	11				Industry	Cultural Tourism		
Project Contents	1.Overall development fairy pool scenic spot, including newly-built (rebuilt and expanded) infrastructures such as tour and sightseeing, Tibetan and Qiang cultural experience, field scientific investigation and exploration; 2. Newly built supporting service facilities such as high-end conference resort hotel and high-end pension leisure. 3. Newly-built traffic tunnel connecting Jizhaigou Scenic Spot.				Construction site	Dalu Village of Jiuzhaigou County		
					Construction period	Five Year		
					Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment				Economic nature			
	Total assets				Total liabilities			
Market Analysis and Forecast	Fairy pool scenic spot covers an area of about 300000 hectares, with the beauty of Jiuzhaigou scenery and the oddity of Yellow Dragon calcified color pool and very high tourism development quality. It is about 40 km away from Jiuzhaigou scenic spot, separated from Jiuzhai Paradise Intercontinental Hotel only by a mountain, echoes with Zhongzha International Conference Resort to be constructed at a distance, is the only virgin land to be exploited around Jiuzhaigou Scenic Spot and has scarce resources within the territory of Jiuzhaigou county. In history, Fairy Pool is located at the juncture of Tang Dynasty and Tubo, has optimum ecological environment at its surroundings and has profound historical culture deposits and Tibetan Bonpo culture which is preserved completely, where is suitable for construction of high-end leisure, entertainment, resort, summer resort and Tibetan cultural experience tourist club items.							
Building Conditions	With total investment of RMB 200 million, the infrastructures such as road, tourist center and sightseeing gallery road has been built and there is a 45 km level 4 tourism highway in the scenic spot; It has matured tourism market, in 2013, a total of 4.76 million visitors had been receipted, which can provide adequate customer resources for project construction.							
Total Investment	500000				Planned capital attraction	500000		
					Raised by the enterprise itself			
Economic Benefits	After the project is completed, it is predicted that annual output value of RMB 500 million and annual profit of RMB 250 million can be realized, and the investment payoff period will be 10-20 years.

10mwp Grid Connection Solar Photovoltaic Power Generation Project

Unit: RMB 10,000

S/N	14				Industry	New energy		
Project Contents	It is planned to carry out construction in batches with 10mwp photovoltaic power generation pilot module as unit and finally construct the solar photovoltaic power generation project with installed capacity of 100mwp.				Construction site	Xiaojin County		
					Construction period	Three years		
					Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment			Economic nature		Number of employees		
	Total assets			Total liabilities		Asset-liability ratio		
Market Analysis and Forecast	Solar photovoltaic power generation is a green energy industry. The project makes use of a lot of slopes in Xiaojin County, does not destroy vegetation and affect the landscape. Under the power generation photovoltaic panel, the planting of the economic crops such as medicinal materials and sugar beet can be developed; at the same time poultry livestock cultivation can be developed to form a three-dimensional development situation. The project has good economic and social benefits.							
Building Conditions	Solar energy resources are abundant, annual average sunshine hours are up to 2214, the project has development conditions. Xiaojin County has a lot of slopes, and the project construction land is plentiful and cheap.							
Total Investment	180000		Introduction of capital		180000			
			Raised by the enterprise itself					
Economic Benefits	After the project is completed, it is predicted that newly-increased tax revenue of RMB 100 million and jobs of 1200 persons can be solved.

Planting (Breeding) Project in Forest

Unit: RMB 10,000

S/N	16				Industry	Modern agriculture				
Project Contents	1. Breeding in forest: it is planned to newly build a standardized breeding base with annual output of 200000 ecological pheasants and 4000 wild boars; 2. Planting in forest: it is planned to newly build 7-14 edible mushrooms planting bases; 1400 mu base of traditional Chinese medicinal materials such as gentiana macrophylla and acanthopanax giraldii harms.				Construction site	Suomo Village, Maerkang				
					Construction period	Two Years				
					Type of Construction	Newly Built				
Status Quo of Project Unit	Name of company				Legal representative					
	Time of Establishment				Economic nature			Number of employees		
	Total assets				Total liabilities			Asset-liability ratio		
Market Analysis and Forecast	As people's living standard improves unceasingly, people's diet structure also has generated great changes, their demands for pure natural and pollution-free healthy food with high protein and low fat become more and more large; "Green and ecological" pheasant, wild boar, pollution-free green agricultural products have large market demands, high price and good market prospects.									
Building Conditions	The project construction site Suomo Village has superior natural conditions and high forest coverage rate, where is suitable for scale development specialty planting and breeding; and has complete configuration of infrastructures such as water, electricity, road and traffic, which can meet the project construction demands.									
Total Investment	8200		Planned capital attraction	5600						
			Raised by the enterprise itself	2600						
Economic Benefits	Through calculation as per annual output of 200000 pheasants, 4000 wild boars and 1000 tons of mushrooms and traditional Chinese medicinal materials, it is predicted that annual sales revenue of more than RMB 80 million can be realized.									
Pre-phase Work	The preliminary planning of project has been basically completed.									
Ways of Cooperation	joint venture ,sole proprietorship

现代牦牛产业科技示范园项目

单位：万元人民币

序号	17				行业	现代农业		
项目内容	1、新建年加工牛羊肉4500吨生产能力的加工厂1个； 2、新建年加工鲜奶1万吨生产能力的乳制品加工厂1个； 3、新建养殖基地1个，养殖基地含暖棚、配种圈舍、养殖圈舍、兽医室等。				建设地点	阿坝县		
					建设工期	3年		
					建设性质	新建		
项目单位现状	公司名称				法定代表人			
	设立时间		经济性质		职工人数			
	总资产		总负债		资产负债率			
市场分析 及 预测	阿坝县牛羊肉具有天然野味及低盐、低糖、低脂肪、高蛋白、肉质优良等特性，近年来备受消费者的青睐。牦牛奶免疫球蛋白含量高，富含天然乳钙，能够帮助人体调节免疫力，提高抗病能力，还含有人体所必需的氨基酸、共轭亚油酸、α-亚麻酸、花生四烯酸、维生素H等多种稀有营养成分。近年来国内外对牛羊肉、牦牛乳制品的需求不断增加，市场价格不断攀升，项目建设市场前景广阔。							
建设条件	项目建设地水、电、路等基础设施齐备；畜牧业是全县的支柱产业，有天然草场1321万亩，因纯天然放牧，饲草料、水质、空气无污染，肉、奶等产品均属上乘绿色健康食品。							
总投资	9000		引进资金		9000			
			企业自筹					
经济效益	项目建成后，预计可实现年利润2300万元。							
前期工作	项目前期规划基本完成

Scientific and Technological Demonstration Park Project of Modern Yak Industry

Unit: RMB 10,000

S/N	17				Industry	Modern agriculture		
Project Contents	1. It is planned to newly construct one processing yard with annual processing and production capacity of 4500 tons of beef and mutton; 2. newly construct one milk product processing factory with annual processing and production capacity of 10000 tons of fresh milk; 3. Newly construct one breeding base, including brooder, mating				Construction site	Aba County		
					Construction period	Three years		
					Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment		Economic nature		Number of employees			
	Total assets		Total liabilities		Asset-liability ratio			
Market Analysis and Forecast	Aba County's beef and mutton has the characteristics such as natural game, low salt, low sugar, low fat, high protein and good meat quality, which are favored by the customers in recent years. Yak milk has high content of immunoglobulin and abundant natural milk calcium, which can help human body to adjust immunity and enhance disease resistance, and also contains multiple nutritional ingredients necessary for human body, such as amino acid, conjugated linoleic acid, α-linolenic acid, arachidonic acid and vitamin H. In recent years, the demands for beef and mutton and yak milk products are increasing continuously and their market prices are soaring, thus the project construction has broad market prospects.							
Building Conditions	The project construction site has complete infrastructures such as water, electricity and road. Animal husbandry is the pillar industry of the whole county, where has 13.21 million mu of natural pasture, because of natural grazing and pollution-free fodder grass, water quality and air, meat and milk product all belong to superior green and healthy food.							
Total Investment	9000		Planned capital attraction		9000			
			Raised by the enterprise itself					
Economic Benefits	After the project is completed, it is predicted that annual profit of RMB 23 million and tax payment of RMB 9 million can be realized.							
Pre-phase Work	The preliminary planning of project has been basically completed.

蔬菜种植及提炼加工项目

单位：万元人民币

序号	18				行业	现代农业		
项目内容	1、新建蔬菜种植基地10000亩； 2、新建20000平方米天然色素提取厂1个；购置安装水溶性色素加工生产线4条，蔬菜功能食品生产线1条，蔬菜保健品生产线1条。				建设地点	阿坝县		
					建设工期	3年		
					建设性质	新建		
项目单位现状	公司名称				法定代表人			
	设立时间			经济性质			职工人数	
	总资产			总负债			资产负债率	
市场分析 及 预测	阿坝县在蔬菜种植过程中无施用农药的习惯，水体、土壤和空气无工业性污染，符合绿色农产品生产条件，蔬菜具有绿色无污染特性；随着消费者对食品安全的重视程度不断提高，生态天然食品添加剂将受消费者、食品加工企业（商户）的青睐，市场前景广阔。							
建设条件	阿坝县地处川西北高原西北部，日照充足，耕地资源丰富，独特的气候条件为蔬菜生产提供了有利的条件；“牧民定居”、“幸福美丽家园”等系列民生工程的实施，使县内基础设施得以全面升级，能满足项目需求；2012年的蔬菜标准化种植基地和2013年生态效益农业示范园的建设成功，为蔬菜产业发展奠定了坚实的基础。							
总投资	10200		引进资金		10200			
			企业自筹					
经济效益	项目建成后，预计可实现年利润2950万元。							
前期工作	项目前期工作正在进行（可研、初设等）

Vegetables Planting and Refining Processing Project

Unit: RMB 10,000

S/N	18				Industry	Modern agriculture		
Project Contents	1. Newly build one 10000 mu vegetables planting base. 2. Newly build one 20000 m2 natural pigment extraction plant; purchase four processing and production lines which installing soluble pigment, one vegetable function food production line and one vegetable health care product production line.				Construction site	Aba County		
					Construction period	Three years		
					Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment				Economic nature			Number of employees
	Total assets				Total liabilities			Asset-liability ratio
Market Analysis and Forecast	In the process of vegetable planting, Aba County has no habit to apply pesticide, water body, soil and air are free of industrial pollution, which comply with green agricultural products production conditions, vegetables has green pollution-free features; As consumers increasingly pay attention to food safety, ecological natural food additives will be favored by customers, food processing enterprises (merchants). It has wide prospects of market.							
Building Conditions	Aba County is located in northwest of Northwestern Sichuan Plateau, where climate is cool, sunshine is adequate, cultivated resources are abundant, unique climate conditions provide favorable conditions for vegetable production; the implementation of series livelihood projects such as "herdsmen settlement" and "happy and beautiful homeland" will make the county's infrastructures update completely to be able to meet the project needs; Successful construction of vegetable standardized planting base in 2012 and ecological profitable agriculture demonstration park in 2013 lay a solid foundation for the development of vegetable industry.							
Total Investment	10200		Planned capital attraction		10200			
			Raised by the enterprise itself					
Economic Benefits	After the project is completed, it is predicted that annual profit of RMB 29.53 million and tax payment of RMB 7.38 million can be realized.							
Pre-phase Work	The preliminary work of project is in progress (i.e., feasibility study and preliminary design).

黑水高半山万亩道地中药材种植加工项目

单位：万元人民币

序号	19				行业	现代农业			
项目内容	建1万亩秦艽、0.3万亩大黄、0.5万亩红毛五加、0.2万亩党参种植基地；新建制种育苗基地500亩，包括改土、围栏、生产房、灌溉及作业道附属设施建设；新建配套中药饮片厂一个。				建设地点	黑水县			
					建设工期	2年			
					建设性质	新建			
项目单位现状	公司名称				法定代表人				
	设立时间				经济性质			职工人数	
	总资产				总负债			资产负债率	
市场分析 及 预测	黑水县属季风高原型气候，旱、雨季分明，日照充足，无霜期平均166.1天，独特的气候条件适宜秦艽、大黄、红毛五加、党参等多种名贵中药材生长。近年来，随着野生中药材资源迅速减少以及市场需求的不断增加，在黑水县开展高半山万亩道地中药材项目市场前景广阔。								
建设条件	全县共有耕地面积0.65万公顷，退耕还林地面积0.52万公顷，土地成本低，群众种植中药材积极性高；秦艽、大黄、红毛五加、党参等已先后在多个乡镇试种成功，项目实施条件成熟。								
总投资	6000		引进资金		6000				
			企业自筹						
经济效益	项目建成后，预计可实现年收益4000万元。

Ten Thousand mu of Traditional Chinese Medicinal Materials Processing Project in Bangao Mountain, Heishui County

Unit: RMB 10,000

S/N	19				Industry	Modern agriculture			
Project Contents	It is planned to construct 10000 mu gentiana macrophylla, 3000 mu rheum officinale, 5000 mu acanthopanax giraldii harms and 2000 mu codonopsis pilosula planting bases; Newly construct a 500 mu seeds production and seedlings culture base, including soil improvement, fence, production house irrigation and operation way ancillary facilities construction; Newly construct one supporting Chinese herbal pieces plant.				Construction site	Heshui County			
					Construction period	Two Years			
					Type of Construction	Newly Built			
Status Quo of Project Unit	Name of company				Legal representative				
	Time of Establishment				Economic nature			Number of employees	
	Total assets				Total liabilities			Asset-liability ratio	
Market Analysis and Forecast	Heishui County belongs to monsoon plateau type climate with distinct drought and rainy seasons, adequate sunshine and average frost-free period of 166.1 days, its unique climate conditions are suitable for growth of multiple precious traditional Chinese medicinal materials such as gentiana macrophylla, rheum officinale, acanthopanax giraldii harms and codonopsis pilosula. In recent years, as wild traditional Chinese medicinal materials resources reduce rapidly and the market demands increase continuously, to develop the ten thousand mu of traditional Chinese medicinal materials project in Gaoban Mountain, Heishui County has broad market prospects.								
Building Conditions	In the county, there are 96000 mu available land for returning the grain plots to forestry, land cost is low and the masses has high enthusiasm to plant traditional Chinese medicinal materials; gentiana macrophylla, rheum officinale, acanthopanax giraldii harms, codonopsis pilosula, etc. have been successfully planted in several villages and towns successively, the project has matured implementation conditions.								
Total Investment	6000		Planned capital attraction		6000				
			Raised by the enterprise itself						
Economic Benefits	After the project is completed, it is predicted that annual earnings of RMB 40 million can be realized.								
Pre-phase Work	The planning is being prepared.

卓克基《尘埃落定》度假村项目

单位：万元人民币

序号	20			行业	现代服务业		
项目内容	新建五星级酒店、会议中心；依山就势新建嘉绒民居特色别墅群。在卓克基古镇与西索民居之间的梭磨河上，新建廊桥一座，底层作为古镇到五星级酒店的交通通道，上面几层设置为桥上花园餐厅。			建设地点	马尔康县卓克基镇		
				建设工期	5年		
				建设性质	新建		
项目单位现状	公司名称				法定代表人		
	设立时间		经济性质		职工人数		
	总资产		总负债		资产负债率		
市场分析 及 预测	本项目所在地有国家重点文物保护单位、全国一百个经典红色旅游景点——卓克基土司官寨，省级文物保护单位西索民居，红军博物馆和嘉绒古镇等旅游景点，是马尔康正在创建国家4A级旅游景区的核心地。因此，在卓克基镇新建集嘉绒文化、土司文化及红色文化为一体的标志性景观和主题酒店，具有良好的市场前景。						
建设条件	马尔康是阿坝州的政治、经济、文化中心，境内及周边旅游资源极其丰富。汶马高速、红原机场等重大项目的实施，可促进马尔康县旅游人数快速增长。项目建设地属4A级旅游景区创建核心区，基础设施能够满足项目建设需求。						
总投资	10000		引进资金	10000			
			企业自筹				
经济效益	按年均接待游客10万人次、人均消费500元计算，预计可实现年收入5000万元。

Zhuokeji "Chen'ai Luoding" Resort Project

Unit: RMB 10,000

S/N	20			Industry	Modern Service Industry		
Project Contents	Newly build five-star hotel and conference center: newly build Jiarong folk house-style villas. Newly build a gallery bridge above the Suomo River between Zhuokeji Ancient Town and Xisuo Folk House with bottom layer as the traffic aisle from the ancient town to the five-star hotel and the above several layers as garden restaurant on the bridge.			Construction site	Zhuokeji Town, Maerkang County		
				Construction period	Five Years		
				Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative		
	Time of Establishment			Economic nature		Number of employees	
	Total assets			Total liabilities		Asset-liability ratio	
Market Analysis and Forecast	The project location has the tourist attractions such as national key cultural relics protection unit and one of China's top 100 classic red tourism scenic spots, Zhuokeji Tusi Official Dwelling, provincial cultural relics protection unit Suoxi Folk House, the Res Army Museum and Jiarong Ancient Town, where is the core land of Maerkang for building national level 4A tourist attraction. Therefore, to newly construct landmark and theme hotel integrated with Jiarong culture, Tusi culture and red culture in Zhuokeji Town has good market prospects.						
Building Conditions	Maerkang is Aba prefecture's political, economic and cultural center with very abundant tourism resources in the territory and its surroundings. The implementation of major projects such as Wenchuan-Maerkang Expressway and Hongyuan Airport can promote Maerkang's number of tourists to increase rapidly. The project location belong to the core area for building level 4A tourist attraction, infrastructures can meet the project construction needs.						
Total Investment	10000		Introduction of capital	10000			
			Raised by the enterprise itself				
Economic Benefits	It is predicted that annual income of RMB 50 million can be realized through calculation according to annual average tourist reception capacity of 100000 person-times and consumption per person of RMB 500.						
Pre-phase Work	The preliminary planning of project has been basically completed.

商贸物流中心项目

单位：万元人民币

序号	22				行业	现代服务业		
项目内容	新建周转仓库3000平方米、汽配修理车间5000平方米、废旧收购站2000平方米，建材市场15000平方米。				建设地点	小金县美兴镇		
					建设工期	2年		
					建设性质	新建		
项目单位现状	公司名称				法定代表人			
	设立时间			经济性质			职工人数	
	总资产			总负债			资产负债率	
市场分析 及 预测	近年来，随着小金县经济的快速发展，商贸物流量呈快速增长态势，原有的商贸、物流基础设施已不能满足市场需求。目前县政府已禁止大型货车通往县城中心，同时正着力规范建材交易、废旧物资回收等行业。因此，在小金县建商贸物流中心，即可得到政府的大力支持，又可获得可观的投资收益。							
建设条件	项目建设地各类市政基础设施配套齐全；巴郎山卧龙耿达隧道将于2015年贯通，具有便捷的交通优势。							
总投资	12000		引进资金		12000			
			企业自筹					
经济效益	投资者主要靠经营、出租或出售商铺来回收资金，投资回收期较长。							
前期工作	县城总规即将获得省政府批准							
合作方式	合资或独资

Commercial Logistics Center Project

Unit: RMB 10,000

S/N	22				Industry	Modern Service Industry		
Project Contents	Newly build a 3000 m2 transfer shed, a 5000 m2 automobile accessory and repair workshop, a 2000 m2 waste purchasing station and a 15000 m2 building materials market.				Construction site	Meixing Town, Xiaojin County		
					Construction period	Two Years		
					Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment				Economic nature			Number of employees
	Total assets				Total liabilities			Asset-liability ratio
Market Analysis and Forecast	In recent years, as Xiaojin County's economy develops rapidly and commercial logistics quantity displays a rapid increase, original commercial logistics infrastructures can't meet the market demands. At present, the county government has prohibited heavy-duty goods vehicles from going to the county center and meanwhile is put effect into normalization of the industries such as building materials transaction and waste and old materials recovery. Therefore, to build commercial logistics center in Xiaojin County will obtain great support of the county government and also can obtain considerable investment benefits.							
Building Conditions	The project construction site has complete various municipal infrastructures; Balang Mountain-Wolong-Gengda tunnel will be cut-through in 2015. Thus the project have convenient transportation advantages.							
Total Investment	12000		Introduction of capital		12000			
			Raised by the enterprise itself					
Economic Benefits	Investors mainly rely on operation, renting or selling of shops to recover capital, so it has relatively long recovery period.							
Pre-phase Work	The overall planning of county is about to obtain approval of the provincial government.							
Ways of Cooperation	Joint venture or sole proprietorship

Hongxing Heta Hot Spring Development Project

Unit: RMB 10,000

S/N	23				Industry	Modern Service Industry			
Project Contents	1. Newly construct a tourists reception center, a tent reception center, and a hot spring rest and health center; 2. newly construct tourist hotel, shopping street, tourist gallery road, hot spring batch center, viewing deck, tourist toilet, park, etc.				Construction site	Hongxing Village, Ruoergai County			
					Construction period	Three years			
					Type of Construction	Newly Built			
Status Quo of Project Unit	Name of company				Legal representative				
	Time of Establishment				Economic nature			Number of employees	
	Total assets				Total liabilities			Asset-liability ratio	
Market Analysis and Forecast	Heta Hot Spring is located in Hongxing Village, Nuoergai County, 78km away from the county, only 2km away from national highway No. 213 with convenient transportation. It is a leisure, vacation and summer resort integrated with magical hot spring water, primitive and simple national customs and secluded and beautiful natural scenery. The water of Heta hot spring has special functions, which will attract more visitors to consume.								
Building Conditions	1. The place has already have relatively high popularity, large tourist amount, convenient road, smooth communication, and 110KV to meet the power consumption demands; 2. Heta hot spring water contains the microelements necessary for human body such as calcium carbonate, magnesium, silicon and strongtium, which can alleviate and eliminate the symptoms such as stomach disease, pain in waist and lower extremities, rheumatic pain, hypertension and diabetes.								
Total Investment	9000		Planned capital attraction		9000				
			Raised by the enterprise itself						
Economic Benefits	Through calculation as per annual average tourist reception capacity is 300000-400000 person-times and consumption per person of RMB 200, it is predicted that annual income can reach RMB 60-80 million.								
Pre-phase Work	The preparation of project proposal has been completed.

LNG (液化天然气) 利用项目

单位：万元人民币

序号	24				行业	现代服务业		
项目内容	1、新建LNG气化站及储配站1-2座，并配套建设城市燃气管网； 2、新建LCNG汽车加气站1座、LNG站1-2座。				建设地点	若尔盖县达扎寺镇		
					建设工期	4年		
					建设性质	新建		
项目单位现状	公司名称				法定代表人			
	设立时间		经济性质		职工人数			
	总资产		总负债		资产负债率			
市场分析 及 预测	若尔盖县独特的地理条件和冬长夏短的气候特征，全县对电力、煤炭资源的需求量巨大。LNG液化天然气利用项目可为农牧民群众在能源供应方面提供新的选择；较之煤炭、电力等，LNG液化天然气具有价格低、污染小等特性，必将受到政府的支持和群众的认可，市场前景较好。							
建设条件	交通便捷，各类基础设施配置完善。潜在需求大，属国家、省、州重点扶持领域。LNG供气方式灵活，符合若尔盖县的实际情况。							
总投资	9500		引进资金		9500			
			企业自筹

	Total assets			Total liabilities		Asset-liability ratio	
Market Analysis and Forecast	Fine spherical aluminum powder is a newly-developed high-tech product, which is widely applied to the aspects such as top grade automobile, metallic paint for decoration materials use, electroconduction slurry for electronic products use and high grade refractory. It has large market demands and broad market prospects.						
Building Conditions	Xuankou industrial park has enough water and power supply with relatively low price and complete various infrastructures. In the Xuankou industrial park, virgin aluminum production capacity of Aba Aluminum Plant of Bosai Group expands year by year, materials can be drawn locally, transportation is convenient and raw materials supply is adequate.						
Total Investment	18000		Introduction of capital		18000		
			Raised by the enterprise itself				
Economic Benefits	After the project is completed, it is predicted that annual sales revenue of RMB 12 million and annual profit of RMB 2 million can be realized, and the investment payoff period will be 3-5 years.						
Pre-phase Work							
Ways of Cooperation	sole proprietorship

年产5万吨甲酸钠项目

单位：万元人民币

序号	34			行业	工业		
项目内容	利用电石炉尾气建设年产5万吨甲酸钠项目。购置安装气体存储罐、气体压缩机、除氧反应器、脱碳塔、合成反应器、蒸发器、自动离心机、转窑干燥器、自动包装线以及其它辅助设备。			建设地点	茂县工业园区太安集中区		
				建设工期	1年		
				建设性质	新建		
项目单位现状	公司名称				法定代表人		
	设立时间			经济性质	职工人数		
	总资产			总负债	资产负债率		
市场分析 及 预测	甲酸钠用途广泛，是化工生产中重要的化工原料。国内国际供求市场异常活跃，特别是在医药化工中大量改用草酸替代磷酸的生产工艺，使得草酸需求量激增，加上美国无草酸生产厂家，大多从中国进口，日本、欧洲等国需求量也在增长，甲酸钠的市场前景乐观。近年来，我国甲酸钠产业发展较快，到2011年产量达49万吨，需求量则超过了55万吨。此外，我国甲酸钠的下游产品甲酸及草酸的生产总量不能满足国内需要，同时我国也是保险粉生产大国，每年消耗甲酸钠大约为总产量的60%左右，因此，国内甲酸钠市场前景非常看好。预计未来五年内，需求量仍将保持年均15%左右的增长速度，再加上年均超过20万吨的国际市场需求量，甲酸钠的市场发展空间较为广阔。						
建设条件	本项目拟利用太安工业集中区内的跃发化工有限公司生产电石时产生的一氧化碳（CO）尾气生产甲酸钠。每生产1吨电石，将产生400立方米的一氧化碳（CO）尾气，利用电石炉尾气和烧碱（NaOH）反应生产甲酸钠，即可对电石炉尾气加以循环利用，减少污染排放物，还可以提高产品附加值，提升茂县产业发展层次。跃发化工有限公司产生的一氧化碳，可满足5万吨甲酸钠生产的需要；同时四川省境内生产烧碱等原料的企业众多，因此，项目所需原料供应充足，且成本相对低廉。						
总投资	5000		引进资金	5000			
			企业自筹				
经济效益	预计总销售收入15000万元，总的生产成本10284.4万元，销售利润4715.6万元，销售税金及附加2364.9万元，税后利润1600万元。						
前期工作	项目前期规划基本完成						
合作方式	独资、合资

50000 Tons per Year Sodium Formate Project

Unit: RMB 10,000

S/N	34			Industry	Industry		
Project Contents	It is planned to construct 50000 tons per year sodium formate project by utilizing calcium carbide furnace tail gas; purchase and install gas storage tank, gas compressor, deoxidization reactor, decarburization tower, synthesis reactor, evaporimeter, automatic centrifuge, turning kiln dryer, automatic packaging line and other auxiliary equipment			Construction site	Taian Concentration Zone of Mao County Industrial Park		
				Construction period	One year		
				Type of Construction	Newly built		
Status Quo of Project Unit	Name of company				Legal representative		
	Time of Establishment			Economic nature	Number of employees		
	Total assets			Total liabilities	Asset-liability ratio		
Market Analysis and Forecast	Sodium formate is extensively used, which is an important chemical raw material in chemical industry production. Domestic and international supply and demand markets are abnormally active, especially the production process that slathers oxalic acid instead of phosphoric acid in pharmaceutical chemicals makes the oxalic acid demand increase sharply, plus the United States has no oxalic acid manufactures, oxalic acid is mostly imported from China, the quantity demanded by Japan, Europe etc. also increases, thus sodium formate has optimistic market prospects. In recent years, our country's sodium formate industry develops faster, the sodium formate output increased to 490000 tons by 2011, and the quantity demanded exceeded 550000 tons. In addition, in our country, the total production quantity of down-stream products formic acid and oxalic acid of sodium formate cannot meet the domestic demand yet, meanwhile our country also is a big country to produce sodium hydrosulfite, annual consumption of sodium formate is about 60% of the total output. Therefore, the domestic sodium formate market has very good prospects. It is predicted that within the next 5 years the demand will still be kept at an annual average growth rate of about 15%, plus annual average international market demand exceeds 200000 tons, thus the sodium formate market has relatively broad development space.						
Building Conditions	It is planned to use the carbon monoxide (CO) tail gas generated when calcium carbide is produced by Yuefa Chemical Co., Ltd. in Taian Industrial Concentration Zone to produce sodium formate. 400 m3 CO tail gas will be generated for production of 1 tons of calcium carbide, using the reaction between calcium carbide furnace tail gas and NaOH to produce sodium formate can make cyclic utilization for calcium carbide furnace tail gas and reduce pollution emission, and also can improve the added value of products and promote Mao County's industry development level. The CO generated by Yuefa Chemical Co., Ltd. can meet the needs for production of 50000 tons of sodium formate; meanwhile, there are many enterprises to produce the raw materials such as caustic soda in Sichuan, therefore, the raw materials demanded by the project are in abundant supply and have relatively low costs.						
Total Investment	5000		Introduction of capital	5000			
			Raised by the enterprise itself				
Economic Benefits	It is predicted that total sales revenue will be RMB 150 million, total production cost will be RMB 102.844 million, selling profit will be RMB 47.156 million, sales tax and extra charges will be RMB 23.649 million and after-tax profits will be RMB 16 million.						
Pre-phase Work	The preliminary planning of project has been basically completed.						
Ways of Cooperation	sole proprietorship, joint venture

旅游纪念品加工项目

单位：万元人民币

序号	35				行业	工业	
项目内容	新建集旅游纪念品研发、加工、销售为一体的旅游纪念品生产基地。				建设地点	松潘县青云乡	
					建设工期	1年	
					建设性质	新建	
项目单位现状	公司名称	松潘县中盈农业产业化投资有限公司		法定代表人	杨英能		
	设立时间	2013年12月	经济性质	民营	职工人数	60	
	总资产	3亿元-5亿元	总负债		资产负债率		
市场分析 及 预测	随着生活水平的提高，人们对能反映旅游景点风情，既有收藏价值，又有观赏价值和实用价值的旅游纪念品需求量逐年增加。本项目可依托松潘藏、羌、回、汉等多民族融合、聚居的独特文化及九寨、黄龙瑰丽的自然风光，对独具特色的旅游纪念品进行系列开发。松潘位于九寨沟国际旅游区，游客接待量大，旅游纪念品加工市场前景广阔。						
建设条件	项目规划、设计、环评、三通一平等前期工作全部完成，已具备开工条件。成熟的旅游市场可为本项目提供充足的市场。						
总投资	7000		引进资金	3500			
			企业自筹	3500			
经济效益	项目建成后，预计可实现年销售收入1200万元，年利润200万元。						
前期工作	项目前期规划基本完成						
合作方式	独资或合资

Tourist Souvenir Processing Project

Unit: RMB 10,000

S/N	35				Industry	Industry	
Project Contents	It is planned to newly build a tourist souvenir production base integrated to R&D, processing and sales of tourist souvenir.				Construction site	Qingyun Village, Songpan County	
					Construction period	One year	
					Type of Construction	Newly Built	
Status Quo of Project Unit	Name of company				Legal representative		
	Time of Establishment			Economic nature		Number of employees	
	Total assets			Total liabilities		Asset-liability ratio	
Market Analysis and Forecast	With the improvement of living standards, people's demands for the tourist souvenirs which have collection value, ornamental value and practical value increase by years. The project can make series development of the tourist souvenirs with unique features based on the unique cultures of Songpan Tibetan, Qiang, Hui, Han, etc. multi-national fusion and gathering and Jiuzhai and Yellow Dragon's beautiful natural scenery. Songpan is located at Jiuzhaigou international tourist area with large tourist reception capacity and domestic market potential, where tourist souvenirs can be directly sold to foreign countries. Thus the project has broad market prospects.						
Building Conditions	The preliminary works such as project planning, design, environment assessment and three supplies and one leveling have been completed. The project has already had the conditions for starting construction. Matured tourist market can provide adequate market for the project.						
Total Investment	7000		Introduction of capital	3500			
			Raised by the enterprise itself	3500			
Economic Benefits	After the project is completed, it is predicted that annual sales revenue of RMB 12 million and annual profit of RMB 2 million can be realized, and the investment payoff period will be 3-5 years.						
Pre-phase Work	The preliminary planning of project has been basically completed.

生物制药建设项目

单位：万元人民币

序号	36			行业	工业		
项目内容	新建生物提取sod、凝血酶、免疫血清壮骨粉、玛咖素研发、提取生产线、加工厂房等；购置安装相关配套设施设备。			建设地点	松潘县青云乡		
				建设工期	2年		
				建设性质	新建		
项目单位现状	公司名称	松潘县中盈农业产业化投资有限公司		法定代表人	杨英能		
	设立时间	2013年12月	经济性质	民营	职工人数	60	
	总资产	3亿元-5亿元	总负债		资产负债率		
市场分析 及 预测	超氧化物歧化酶简称SOD，是一种源于生命体的活性物质，能消除生物体在新陈代谢过程中产生的有害物质，是现代化妆品和保健品的原材料之一。凝血酶广泛用于小血管、消化道及外伤止血等。免疫血清壮骨粉是一种保健类的补钙产物。该项目重点依托当地盛产的牦牛血、牦牛骨、羊胎盘、贝母、虫草等进行生物提取和深加工，市场需求量大，产品附加值高，利润十分可观。						
建设条件	该项目规划、设计、环评、三通一平等前期工作全部完成，已具备开工条件。松潘县境内有有机场，数条国、省道贯穿全县，成兰铁路松潘段已正式开工建设，交通极其便利，原材料供应充足。						
总投资	4700		引进资金	2350			
			企业自筹	2350			
经济效益	项目建成后，预计年销售收入可达4000万元，年利润可达800—1000万元，投资回收期为3—5年。						
前期工作	项目前期规划基本完成						
合作方式	独资或合资

Biological Pharmacy Construction Project

Unit: RMB 10,000

S/N	36			Industry	Industry		
Project Contents	It is planned to newly build research and development, extraction production line and processing plant of biological extracts sod, thrombin, immune sera bone powders and maca; purchase and install relevant supporting facilities and equipment.			Construction site	Qingyun Village, Songpan County		
				Construction period	Two Years		
				Type of Construction	Newly Built		
Status Quo of Project Unit	Name of company				Legal representative		
	Time of Establishment				Economic nature		
	Total assets				Total liabilities		
Market Analysis and Forecast	Superoxide dismutase (SOD) is a kind of active substances derived from living organism which can remove the harmful substances produced by the living body in the process of metabolism, and is one of the raw materials of modern cosmetics and health products. Thrombin is widely applied to stopping small vessel bleeding, digestive tract bleeding, traumatic bleeding, etc. Immune serum bone power is a kind of health-type calcium supplement product. The project mainly carry out biological extraction and deep processing based on fritillary, worm grass, yak blood, yak bone, sheep placenta, etc. which are produced locally. It has very large market demands, high product added value and very considerable profits.						
Building Conditions	The preliminary works such as project planning, design, environment assessment and three supplies and one leveling have been completed. The project has already had the conditions for starting construction. Songpan has an airport and several national and provincial highways running through the whole county, construction of Songpan section of Chengdu-Lanzhou Railway has been formally started. It has very convenient transportation and enough raw materials supply.						
Total Investment	4700		Introduction of capital		2350		
			Raised by the enterprise itself		2350		
Economic Benefits	After the project is completed, it is predicted that annual sales revenue of RMB 12 million and annual profit of RMB 2 million can be realized, and the investment payoff period will be 3-5 years.						
Pre-phase Work	The preliminary planning of project has been basically completed.

矿泉水提升项目

单位：万元人民币

序号	37				行业	工业	
项目内容	1、对厂区进行改扩建； 2、对现有生产工艺及生产线进行技改扩能。				建设地点	九寨沟县漳扎镇	
					建设工期	2年	
					建设性质	改扩建	
项目单位现状	公司名称	九寨沟县国有资产管理经营公司		法定代表人	杨代友		
	设立时间		经济性质	县属国有	职工人数	12	
	总资产	2680		总负债	资产负债率		
市场分析 及 预测	九寨沟饮用天然矿泉水水源位于九寨沟县漳扎镇火地坝，是天然出露型岩溶上升泉，日开采水量为1879立方米，年开采能力为71万立方米；因地处原生态的环境中，水质清澈透明，口感纯正，经省地质工程勘察院鉴定，该矿泉水总含量为1.167毫克/升，达到《饮用天然矿泉水》国家标准的界限指标。该项目依托九寨沟品牌效益，具有极佳的市场潜力。						
建设条件	融资企业各类手续齐备，拥有土地、厂房和设备等固定资产；各类基础设施完备。						
总投资	10000		引进资金	10000			
			企业自筹				
经济效益	项目建成后，预计可实现年产值2亿元，年利润0.1亿元，投资回收期为10年左右。

Mineral Water Improvement Project

Unit: RMB 10,000

S/N	37				Industry	Industry	
Project Contents	It is planned to newly build a tourist souvenir production base integrated to R&D, processing and sales of tourist souvenir.				Construction site	Zhangzha Town, Jiuzhaigou County	
					Construction period	Two Years	
					Type of Construction	Reconstruction and expansion	
Status Quo of Project Unit	Name of company				Legal representative		
	Time of Establishment			Economic nature		Number of employees	
	Total assets			Total liabilities		Asset-liability ratio	
Market Analysis and Forecast	Jiuzhaigou drinking natural mineral water source is located at Huodiba, Zhangzha Town, Jiuzhaigou County, which is a natural outcropped karst rising spring with daily water exploitation quantity of 1879 cubic meters and annual exploitation capacity of 710000 cubic meters; Because it is located in the original ecological environment, it has clear and transparent water quality and pure taste. The mineral water contains strontium of 1.167 mg/l via the provincial geological engineering investigation institute's appraisal, which meet the limit index of national standard "Drinking Natural Mineral Water". The project has great market potential based on Jiuzhaigou brand benefit.						
Building Conditions	Financing companies have complete various kinds of formalities and own the fixed assets such as land, plant and equipment; All kinds of infrastructures are complete.						
Total Investment	10000		Introduction of capital	10000			
			Raised by the enterprise itself				
Economic Benefits	After the project is completed, it is predicted that annual sales revenue of RMB 12 million and annual profit of RMB 2 million can be realized, and the investment payoff period will be 3-5 years.

高性能锂离子电池生产投资项目

单位：万元人民币

序号	38				行业	工业		
项目内容	新建年产2000万只高性能锂离子电池生产线，办公楼、科研楼及附属用房。				建设地点	成阿工业园		
					建设工期	2年		
					建设性质	新建		
项目单位现状	公司名称				法定代表人			
	设立时间		经济性质		职工人数			
	总资产		总负债		资产负债率			
市场分析 及 预测	高性能锂离子电池可为通讯、航空、医疗、机动车辆、影视等提供动力保障，属现代化高科技外向型产品，它正以惊人的速度逐步取代镍铬和镍氢电池。从中国和全球市场来看，锂离子电池的市场需求非常庞大。							
建设条件	项目拟建地成阿工业园区地处成都市金堂县，交通便捷，物流发达，入园企业可享受国家支援灾后重建、支持藏区发展等优惠政策。阿坝州锂矿资源丰富，利用技术优势进行深加工，将大大提高锂产业的资源价值，实现利益最大化。							
总投资	20000		引进资金		20000			
			企业自筹					
经济效益	项目建成后，预计可实现年利润1500万元。							
前期工作	项目前期规划基本完成

High-performance Lithium Ion Battery Production, Investment and Construction Project

Unit: RMB 10,000

S/N	38				Industry	Industry		
Project Contents	It is planned to construct 20MTPA high-performance lithium ion battery production line, office building, scientific research building and accessory occupancy.				Construction site	Chengdu-Aba Industrial Park		
					Construction period	Two Years		
					Type of Construction	Newly built		
Status Quo of Project Unit	Name of company				Legal representative			
	Time of Establishment		Economic nature		Number of employees			
	Total assets		Total liabilities		Asset-liability ratio			
Market Analysis and Forecast	High-performance lithium ion battery can provide power guarantee for communication, aviation, medical treatment, motor vehicles, film and television and so on, which belongs to modernized high-tech extravert type product. It is replacing nickel-chromium and nickel-metal hydride batteries gradually at an alarming rate, and is becoming the main power of consumer electronic products. From the points of China and global market, lithium ion battery has very large market potential.							
Building Conditions	The project construction site Chengdu-Aba Industrial Park is situated in Jintang County, Chengdu City with convenient transportation, developed logistics and adequate water, electricity and gas energy sources. The enterprises entering the park can enjoy the national preferential policies such as supporting post-disaster reconstruction and supporting Tibetan areas development. Aba Prefecture has abundant lithium mineral resources. Making use of technological advantages to carry out deep processing will greatly improve the resource value of lithium industry and realize profit maximization.							
Total Investment	20000		Introduction of capital		20000			
			Raised by the enterprise itself					
Economic Benefits	After the project is completed, is will realized the profit of RMB 15 million and the tax payment of RMB 8 million.							
Pre-phase Work	The preliminary planning of project has been basically completed.							
Ways of Cooperation	cooperation
